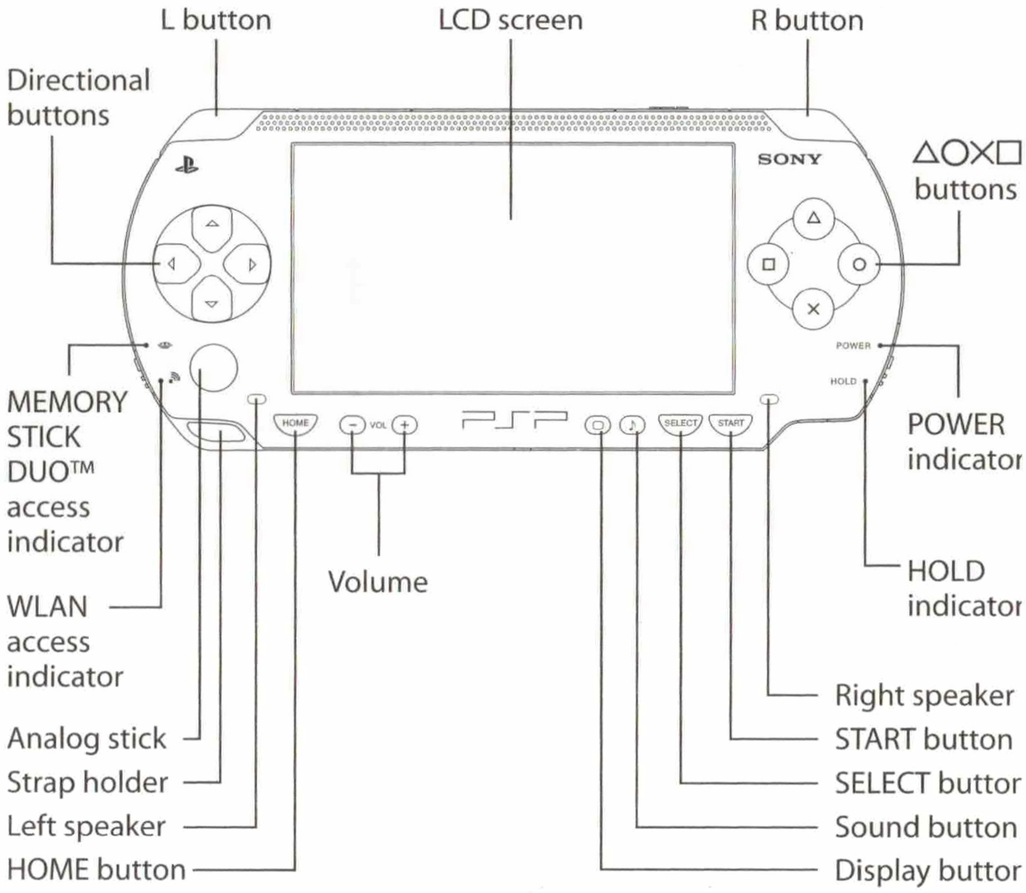
STARTING THE GAME

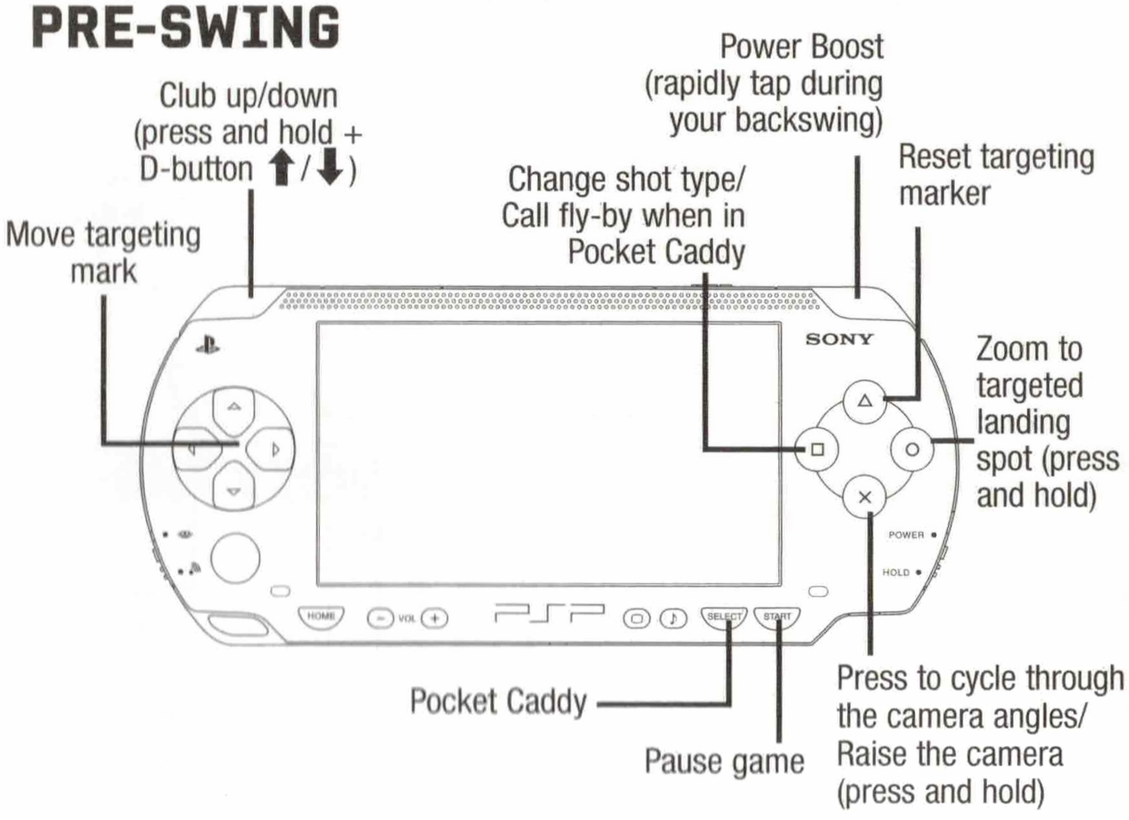
PSP® (PLAYSTATION®PORTABLE) SYSTEM CONFIGURATION



COMPLETE CONTROLS

Be sure to check out the tutorial in Quick Play mode prior to playing a round to get the hang of the swing controls.

PRE-SWING



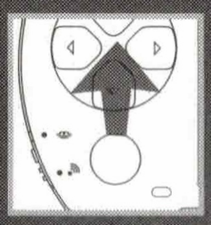
NOTE: The Pocket Caddy provides you with key information that can help you make the appropriate decisions before every shot.

SWING

Pull straight back on the Analog stick to begin your backswing—the closer you get to the peak of your backswing, the closer your swing will be to 100 percent power.

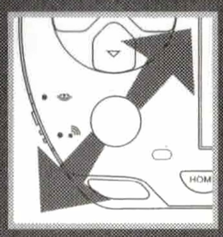
Push straight forward to begin your downswing.

NOTE: Be sure to shorten your backswing if the club's potential power is more than the distance of the shot. For example, if your pitching wedge can hit the ball 90 yards, but the pin is only 45 yards away, only use half of your backswing.



Pull back diagonally and press up in an opposite straight line to draw or fade the shot.

Press the R button for a power boost—the more times you press during your backswing, the bigger your power boost.



MASTERING SHOT POWER

Many factors affect the power you put into your swing. Rough, sand traps, slope, and elevation are just a few of the many factors that can affect how far your ball actually travels.

In many cases you need to increase your shot power or even use a different club to get the ball to travel the distance you want. There are also situations where you need to decrease your power or use a different club to avoid overshooting your target—like when you're putting downhill or shooting an approach shot at a lower-elevation green.

Adjusting your power and club selection to your circumstances is key to consistently hitting great shots.

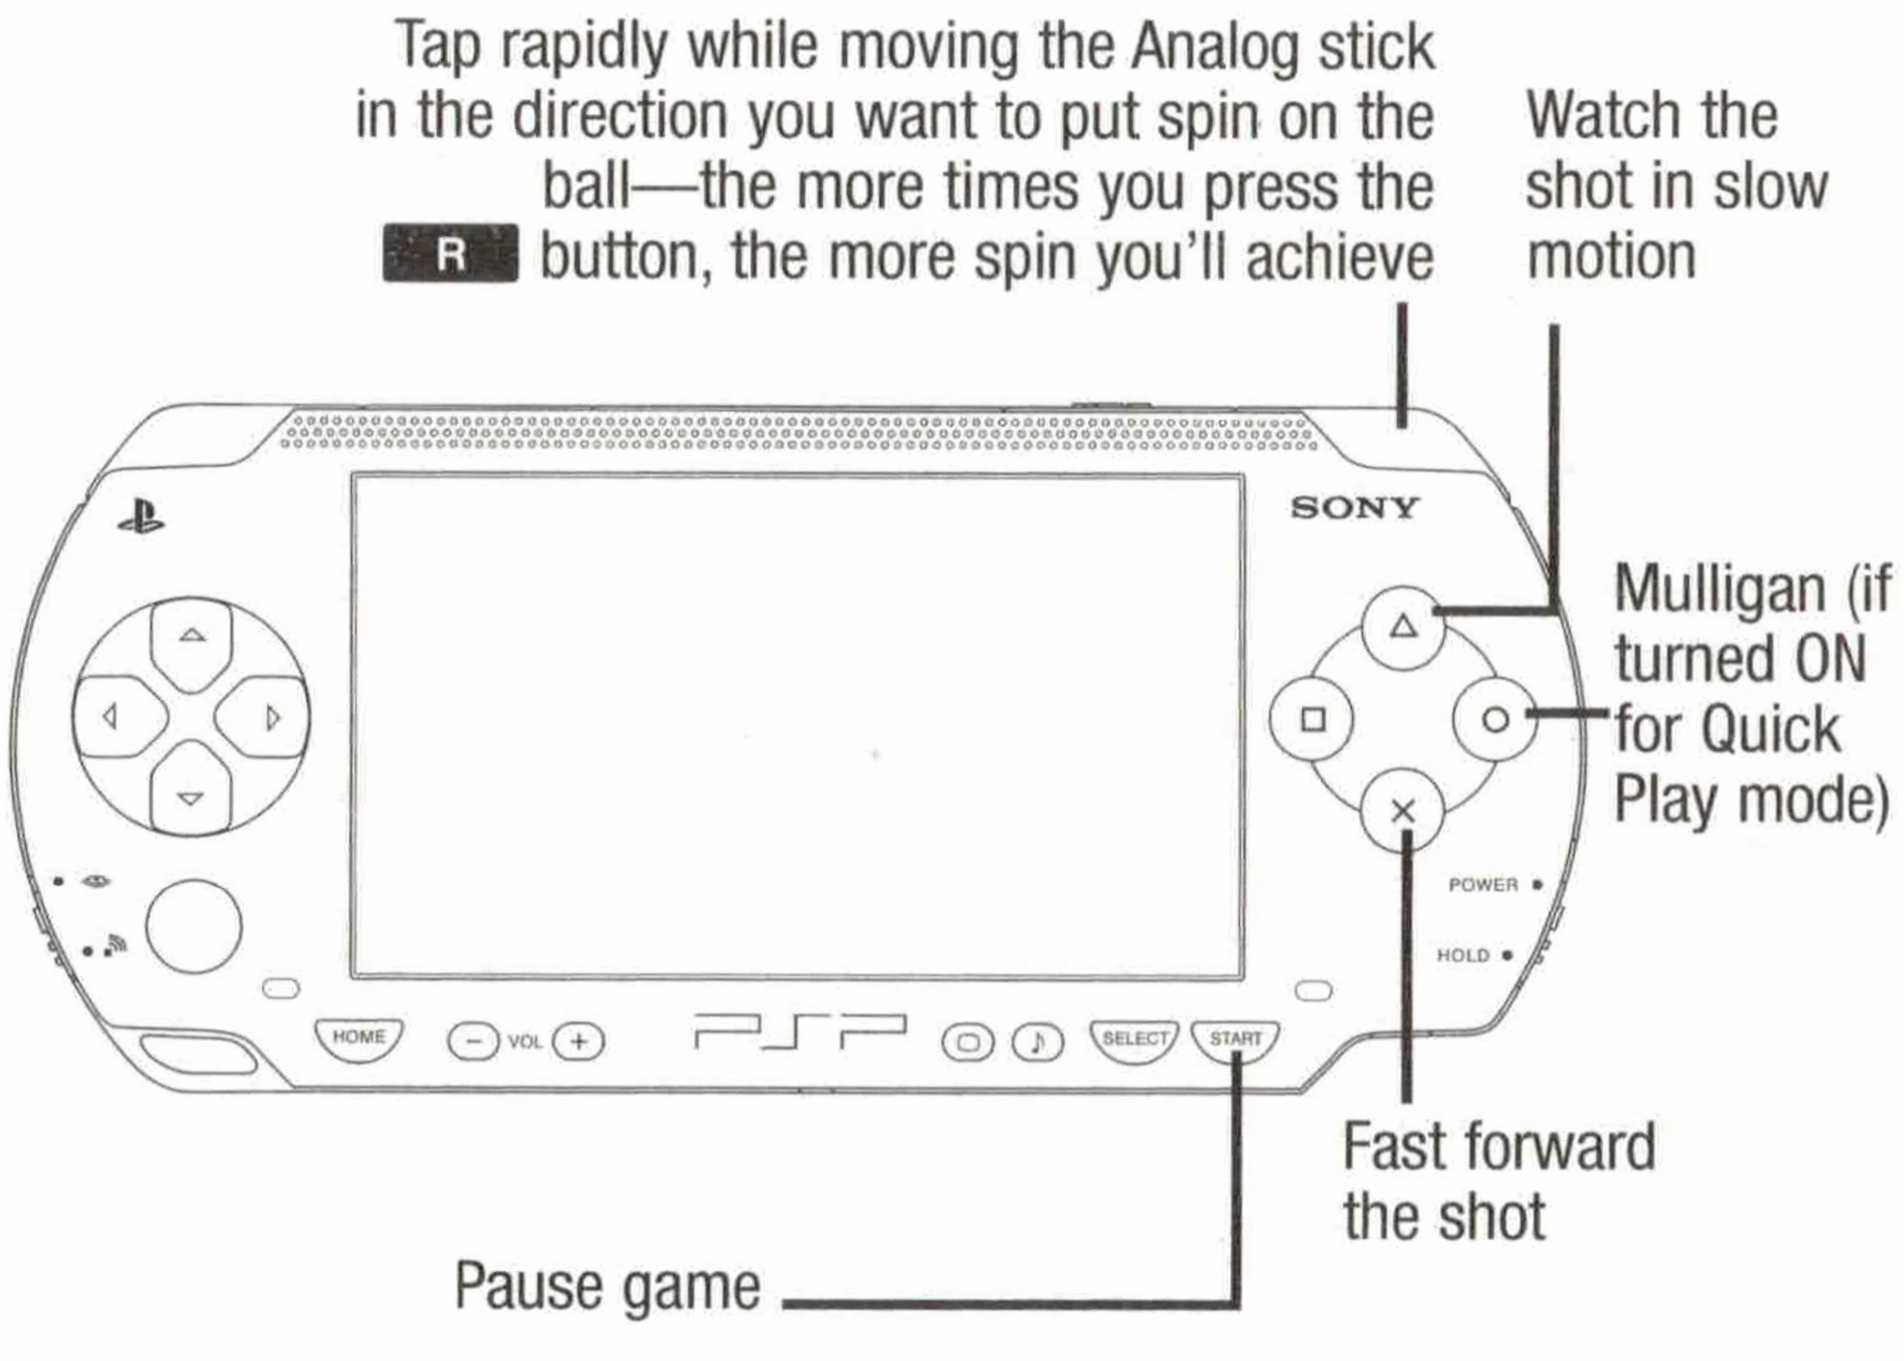
DETERMINING YOUR SHOT

Press the ■ button to toggle through the different shot types—full, chip, pitch, flop, draw, fade, and putt—depending on where your ball lies.

NEW SWING PATH METER

View your swing accuracy with the new Swing Path Meter, which shows the angle of your swing at the time it made contact with the ball as well as the resulting shot (straight, push, pull, cut, fade, or draw). Use it to fine tune your swing and avoid any common mistakes.

CONTROL THE BALL IN-FLIGHT



Tap rapidly while moving the Analog stick in the direction you want to put spin on the ball—the more times you press the R button, the more spin you'll achieve

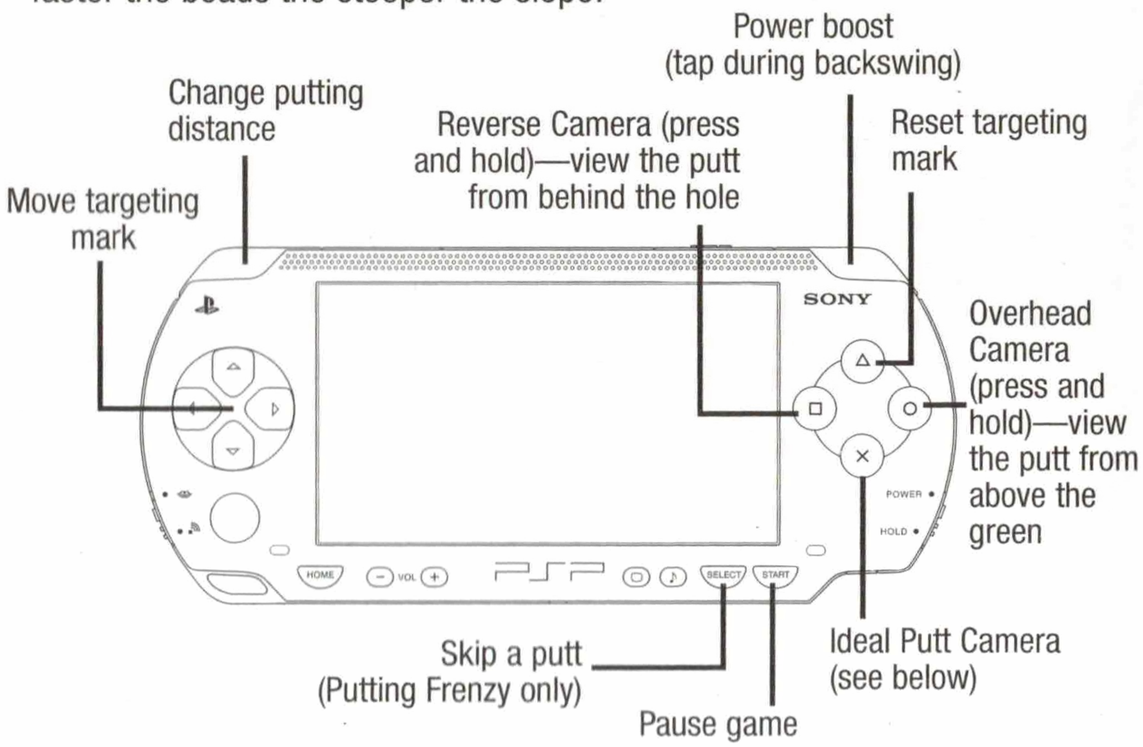
PUTTING CONTROLS

READING THE PUTTING GRID

A colored grid overlays the green when you're putting. The grid is green where it is relatively level, red where it slopes upward relative to the player, and blue where it slopes down. Use that information to determine how firm (or soft) to putt the ball.

The moving beads on the grid indicate the direction of the slope—the faster the beads the steeper the slope.



IDEAL PUTT CAMERA

Press the ⊗ button and the camera moves along the optimal line for the putt.

Watch how the camera rotates before it moves toward the hole: if the camera rotates to the left before it moves towards the hole, then you should aim more to the left. If the camera moves to the right before it moves towards the hole, you should aim more to the right. If the camera does not rotate, then you are aimed on the correct line.

The Ideal Putt Camera doesn't show you how much power to put into your putt. You may find the ideal line, but putt with too much power and the ball may still carry past the hole—too little power and you either fall short or the ball breaks too early. Sink putts by reading the speed, break, and position of the hole on the green.

NOTE: The Ideal Putt Camera is not always available. When it is available, the message "Ideal Putt Cam" appears on-screen.

NOTE: Sometimes one of your putter's distance levels comes up just short of the hole but the next level up overshoots the hole. If you are in between distance levels like this, it's beneficial to go with the shorter of the two levels and apply extra power with a power boost.

DETERMINING PUTTING POWER

Like the swing control, maximum putting power is determined by the distance you pull back on the Analog stick. For example, if the hole is 5 feet away and your putter is rated at 10 feet, only use half of your backswing. The Power Meter shows you how far you've gone with your backswing.

PLAYING THE GAME

QUICK PLAY

In Quick Play mode, you can play the tutorial or a round of golf with your created golfer or any unlocked golfer on any unlocked course, with or without opponents.

Stroke Play	The most basic round of golf, every stroke counts and the player with the lowest total at the end of the round wins.
Skins	Every hole has a monetary value, and the player who wins the hole takes the cash. In the event of a tie the money carries over to the next hole, sweetening the pot.
Match Play	Go head-to-head with your opponent on every hole in Match Play. The player who wins the most holes wins.
Stableford	Based on a system that awards points based on the score each hole (eagles, birdies, and pars), your final score is the sum of the points earned over the course of a round.

After selecting the game mode, course, and number of players, choose which holes you want to play on the course. You can pick ALL 18, FRONT 9, BACK 9, RANDOM 3, or CUSTOM.

Press the ▣ button to customize your options, or press the ◉ button to choose the golfers for the match.

SAVING AND LOADING

Create a user profile and save your progress to a Memory Stick Duo. *Tiger Woods PGA TOUR 07* uses an Autosave feature to save and load game data.

After a round is completed, or when settings have been changed, your progress is automatically saved to your user profile.

SAVE AND QUIT

You can save your progress in-game via the Save and Quit option in the Pause menu. If you then shut down and try to return to your game at a later time, the game detects your progress when that mode is revisited and you are given the option to pick up where you left off.

NOTE: You may only use the Save and Quit option on your golfer's turn before taking the next shot or before any golfer's tee shot.

PGA TOUR® CAREER MODE

You have just made it to the PGA TOUR® after a very successful showing in Qualifying School. Q-School was grueling, but with your Bronze TOUR® Card in hand you have three years to see if you have what it takes to compete at the pro level and win the coveted FedEx Cup.

You won't have all the skills to be a big threat at first so it's important to work in some practice time as you advance through your career. Your progress is tracked after each event and the necessary practice challenges are scheduled on your calendar to help you stay in top form.

A season-long points system ranks the golfers, and the top 30 at season's end are eligible to play in four playoff tournaments in September. The player with the most playoff points after the fourth tournament, The TOUR Championship®, will be awarded the FedEx Cup and a large cash bonus.

To stay in the top 30, you have to earn FedEx Cup Points, which are awarded after each tournament along with prestige points—used to determine your popularity on TOUR—and cash prizes. The higher you place, the more you win, and as long as you make the cut you receive points and cash for your efforts.

As you start performing well in tournaments and mid-week challenges, you may impress a sponsor or get highlighted in a local paper. Play well enough to move up the TOUR ranks, and you just might see yourself on the cover of ESPN Magazine.

CALENDAR

All the key dates you need to know are marked here—from necessary practice sessions to key challenges and tournaments.

Pro Shop — Head into the Pro Shop to upgrade everything from your attributes to your apparel and equipment by pressing the ▣ button.

Journal — Press the ◉ button to access your Journal, which tracks your FedEx Cup Points, wins, trophies, milestones, and events you haven't played yet. View the timeline after each season to see how your career is progressing and to ensure you are on target.

Scrapbook — Now you can save and share your best moments on the golf course. Save your top shots to your Memory Stick Duo and view the images later in the system software. You can also upload them to a computer and trade your scrapbook photos with friends.

Your TOUR® Card, which contains your photo, name, and earnings, appear at the top left corner of the screen. Under that is your prestige level, which starts at zero and goes up to five stars.

MINI-GAMES

Shooting Gallery Earn as many points as possible by hitting the targets with your ball. You are racing against the clock so look for the correct targets to maximize your score.

Putting Frenzy Race against the clock to sink as many putts as possible before time runs out. Putts are scored based on their distance from the hole. In single player, you win by beating the target score before the clock hits zero.

MULTIPLAYER MODE

Challenge your fiercest rivals around the world via Infrastructure mode or play against someone across the room in Ad Hoc mode.

REGISTRATION REQUIRED TO ACCESS ONLINE FEATURES. TERMS & CONDITIONS AND FEATURE UPDATES ARE FOUND AT www.easports.com. YOU MUST BE 13+ TO REGISTER ONLINE.

EA MAY RETIRE ONLINE FEATURES AFTER 30 DAYS NOTICE POSTED ON www.easports.com OR 30 DAYS AFTER THE LAST DAY OF THE 2006 SEASON.

WI-FI (WLAN) FEATURES

Software titles that support Wi-Fi functionality allow you to communicate with other PSP® systems and compete against other players via a connection to a wireless local area network (WLAN). You can adjust the network settings to allow connection to a wireless local area network (WLAN). There are two WLAN modes, Ad Hoc mode and Infrastructure mode.

NOTE: The player is responsible for any Wi-Fi fees.

AD HOC MODE

Ad Hoc mode is a Wi-Fi feature that allows two or more individual PSP® systems to communicate directly with each other.

INFRASTRUCTURE MODE

Infrastructure mode is a Wi-Fi feature that allows the PSP® system to link to a network via a WLAN access point (a device used to connect to a wireless network). In order to access Infrastructure mode features, several additional items are required, including a subscription to an Internet service provider, a network device, a WLAN access point, and a PC. For further information and set up details, please refer to the PSP® system's Instruction Manual.

PLAYING BEHIND A FIREWALL

We recommend that you do not play behind a firewall. However, if you do wish to play behind a firewall, you must open the following ports: **3658** (peer-to-peer connection).

HINT: A WLAN access point is a device used to connect to a wireless network. SSID and WEP keys are types of wireless network information. They may be required when connecting to an access point or a router. This information is generally set in the access point or router using a PC.

MULTIPLAYER MODES

In Multiplayer mode, you can view your record versus other opponents, select your game type, and even wager cash you've earned.

NOTE: Bets are made in $500 increments. If you win a game and your opponent does not have enough cash to cover the wager, you will only receive what's left of your opponent's money.

There are five types of traditional matches to play: STROKE PLAY, SKINS, MATCH PLAY, as well as BINGO BANGO BONGO and the new SHOOTING GALLERY.

Bingo Bango Bongo The player with the highest money total wins by achieving Bingo (longest fairway drive), Bango (first on the green), and Bongo (first in the hole).

➤ You repeat each hole three times (up to six holes). The winner of the hole either removes a club from his opponent's bag or retrieves a club taken earlier by their opponent.

NOTE: The Ideal Putt Camera is not available in this mode.

Shooting Gallery Earn as many points as possible by hitting the targets with your ball while racing against the clock and your opponent. Watch out for the Point Stealer targets! Hitting these will give some of your points to your opponent. Choose from five different levels.
